John: As you can see, the two surety bonds are due for review this year in May. So, we should complete our review before you replace them, so they won't have to be changed in another few months. Doug will need updated maps in order to complete the review – if there have been no changes during these last five years, then probably an escalation will be all that is required for those two sites. However, the Smokey Joe and Montello will have to have a complete review done for sure, since these were placed under a Board Contract clear back in 1977.

Maybe you could get started on the maps, knowing that we will be sending a letter in the very near future.

If you have any questions regarding the upcoming reviews, you can contact Doug at 538-5382.
